STAYCOOL FR MEDIA SPEC SHEET

AMERICA'S MEDIA MANUFACTURING INC.

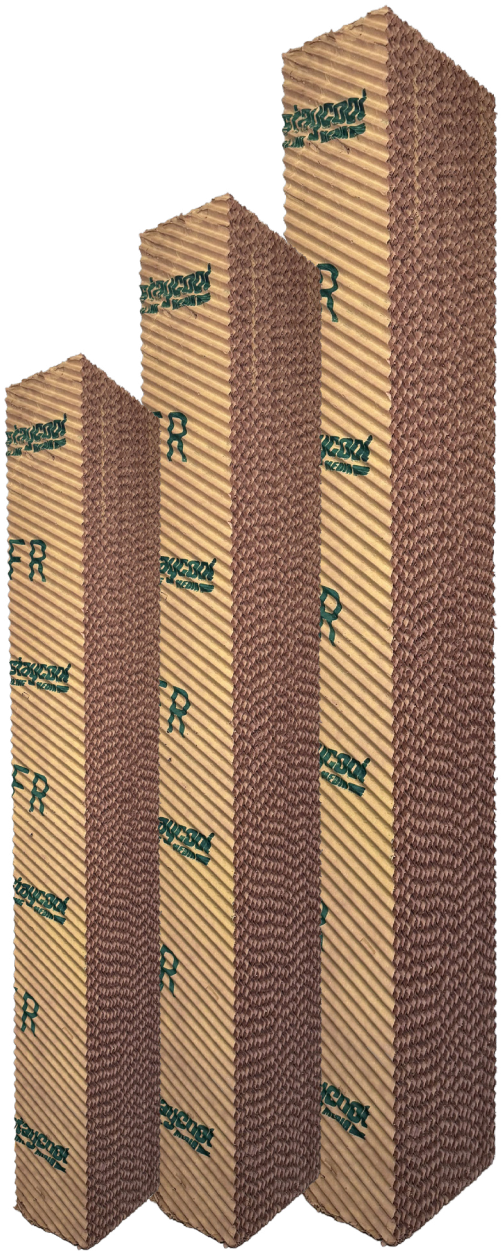

staycool FR KEY FEATURES

ANTIMONY OXIDE FREE
A cleaner, greener formulation that eliminates antimony oxide — a toxic flame-retardant additive found in many traditional media. Safer for people and the planet.

POLYPAPER FR
High-performance flame-retardant polypaper construction delivers excellent fire resistance paired with water-holding and evaporative efficiency essential for optimal cooling.

UL 900 CERTIFIED
Independently tested and certified to the industry's leading surface-burning standard. Proven low flame-spread and smoke-development performance you can trust.

RIGID DURABLE CONSTRUCTION
Precision-engineered rigid design resists sagging, deformation, and damage during shipping, installation, and years of continuous operation.

BUILT FOR REAL-WORLD RELIABILITY
Whether you're specifying for commercial, industrial, or high-occupancy applications, our FR evaporative media gives you the perfect balance of fire safety, environmental responsibility, and long-term performance. No trade-offs. No worries.

Choose the media that protects your people, your property, and your reputation.
